

## Introducing Pancakelock

Pancakelock is an autonomous, frictionless, and decentralized application that aims to bring greater security and legality of operations to the applications built on Binance Smart Chain protocol. The Pancakelock will utilize the BSC to create a full-stack liquidity lock system that allows developers and token holders and to lock their BEP 20 tokens and Liquidity tokens in a smart contract vault and earn \$PLOCK token for using the platform.

Creating a #SAFU atmosphere for the BSC Community.

# Core Products and Services

What the Pancakelock Protocol core development team is working on.

## Liquidity pool locker

The Pancakelock Protocol solves the issue of Pancakeswap exit scamming by using standardized non-custodial smart contracts that locks liquidity.

## Team Token Vesting

The pancakelock smart-contracts will allow founders to create a vesting schedule for team members with specified dates.

## NFT-infused Staking

A set of stakeable NFTs will be offered for purchase in Pancakelock's upcoming public sale in the Q2 of 2021. By staking the NFT on Pancakelock, liquidity providers will be able to enjoy bigger farming multiplier rewards from the fees generated on the platform.

# Our Product Sneak Peek

Our team has come up with a unique engineering and implementation design. We have been actively building this product, and are planning to fund and launch it on Binance Smart Chain.

**Configure Lock**

HARD CAP: 500 BNB

Pancakeswap Listing: 3,000,000 PLOCK and 100% of funds raised from Public Sales will be used to lock liquidity on Pancakeswap.

# The Pancakelock Team

The Pancakelock team isn't fully anonymous, it is made up of a group of developers, financial professionals and community managers who run as an anonymous DAO team. There are about 4 team members working with us, half of them are based in the Bay Area. Our CTO has a background from different blockchain foundation as well as full stack. So we have a very strong tech team to deliver our product.

KYC information: We have completed KYC with ASSSURE DEFI

# Pancakelock Roadmap

Q1-2021

- Token Economics design
- Token Smart Contract creation
- Funding program
- Protocols Development/coding
- Pancakeswap listing
- CEX listing and wallet listing

- Team Formation
- Idea Research
- Creation of Project Document
- Front-end layout and development

Q2-2021

- Product in-house testing
- Audit with certik and solidity.finance
- Staking Contract Development
- Marketing and modifications
- Identify and approach partners and influencers

Q3-2021

- Partnerships and Marketing
- On boarding users
- Improve platform UI/UX
- Further research into dapp extension and modifications

Q4-2021

# Pancakelock Ultimate Goal

Our ultimate goal is to bring more peace of mind to the Binance Smart Ecosystem so that investors can feel more confident in adopting the DEFI technology for the future without the fear of being Rug Pulled.
